

## ENERGY POLICY

As operator of the National Transport System of crude oil, rich gas, ethane and condensate via pipelines, CONPET SA is aware of its responsibilities to operate effectively, promoting long-term sustainability of its operations in economic and energy terms, so that it can continually improve energy performance through its energy management in accordance with ISO 50001:2011. In this respect, CONPET S.A. undertakes, in its energy policy:

- To operate in accordance with the current legal requirements and other applicable requirements in terms of use and energy consumption, as well as and energy efficiency;
- To ensure continuous improvement of energy performance;
- To take action to minimize electrical and fuel losses for heating production, for shunting of loading ramps and vehicles, so as to improve consumption and reduce energy-related costs;
- To provide resources and information necessary to achieve the objectives and targets in the field of energy;
- To consider improving energy performance in new projects and investments as well as in the changes it promotes on equipment, facilities, systems and processes;
- To support the purchase and use of products and services energy efficient;
- To carry out staff awareness and improving communication in order to ensure active participation in achieving objectives and energy targets.

To achieve this policy direction, the Management at the highest level of CONPET declare their will and firm commitment to maintain and improve an energy management system in accordance with SR EN ISO 50001: 2011.

The Management at the highest level shall undertake to provide all necessary resources to maintain and further improve the effectiveness of the energy management system and its processes and delivered in this full authority and responsibility to the Management Representative and Certified Energy Manager – ANRE.
