

A circular diagram illustrating the distribution of 19090 virions across 24 angular sectors. The sectors are labeled with angles from 0° to 354° in 12° increments. Each sector contains a point representing a virion, with labels indicating the number of virions (e.g., 19090, 336, 354) and the corresponding virion type (e.g., virole I,III,V,VII; virole II,IV,VI). The distribution is non-uniform, with a high concentration of virions in the sectors between 180° and 270°.
